IN THE CLAIMS

1 (Currently Amended). A neutron shielding material composition comprising: a hydrogenated bisphenol resin;

a refractory material having higher density than that of the hydrogenated bisphenol resin;

a density-increasing agent having higher density than that of the refractory material;

a curing agent component; and

a boron compound,

wherein said neutron shielding material composition maintains the density of a base resin comprising said curing agent component and the refractory material[[.]]; and wherein density of the neutron shielding material composition is from 1.62 g/cm³ to 1.72 g/cm³.

2 (Previously Presented). A neutron shielding material composition comprising a hydrogenated bisphenol epoxy represented by the following structural formula (1):

wherein each of R_1 to R_4 is independently selected from the group consisting of CH_3 , H, F, Cl and Br, and n is from 0 to 2;

a refractory material having higher density than that of the hydrogenated bisphenol resin;

a curing agent component having at least one ring structure and a plurality of amino groups;

a density-increasing agent having higher density than that of the refractory material; and

a boron compound,

wherein said neutron shielding material composition maintains the density of a base resin comprising said curing agent component and the refractory material.

3 (Previously Presented). The neutron shielding material composition according to claim 1, further comprising one or more compounds selected from the group consisting of a compound represented by the structural formulas (2), (3), (6) and (9):

$$R_{\delta} - 0 \longrightarrow 0 \longrightarrow H$$

$$(2)$$

wherein R₅ is a C1-10 alkyl group or H, and n is from 1 to 24;

$$(CH_2)_{\overline{n}} 0 - C$$

$$(3)$$

wherein n is from 1 to 8;

$$\begin{array}{c} CH_{2}-CH-CH_{2}-0 \\ \hline \\ 0 \\ \end{array} \\ \begin{array}{c} R_{9} \\ C \\ R_{10} \\ \end{array} \\ \begin{array}{c} CH_{2}-CH-CH_{2} \\ \hline \\ R_{12} \\ \end{array} \\ \begin{array}{c} CH_{2}-CH-CH_{2} \\ \hline \\ 0 \\ \end{array} \\ \begin{array}{c} CH_{2}-CH-CH_{2} \\ \hline \\ 0 \\ \end{array} \\ \begin{array}{c} (6) \\ \end{array} \\ \end{array}$$

wherein each of R₉ to R₁₂ is independently selected from the group consisting of CH₃, H, F, Cl and Br, and n is from 0 to 2; and

$$0 \longrightarrow CH_2 - 0 \longrightarrow CH \longrightarrow 0$$
 (9)

4 (Previously Presented). The neutron shielding material composition according to claim 1, comprising, as the curing agent component, a compound represented by the structural formula (4):

$$H_2N \longrightarrow CH_2 \longrightarrow NH_2$$
 (4)

5 (Previously Presented). The neutron shielding material composition according to claim 1, wherein the curing agent component comprises one or more of compounds represented by the structural formulas (5) and (8):

$$H_{2}N-CH_{2} \qquad CH_{2}-NH_{2}$$

$$CH = CR_{8}$$

$$R_{6}-N \qquad N \qquad (8)$$

$$R_{7}$$

wherein R₆, R₇ and R₈ each is independently a C1-18 alkyl group or H.

6 (Previously Presented). The neutron shielding material composition according to claim 1, further comprising a filler.

Claim 7 (Canceled).

8 (Previously Presented). The neutron shielding material composition according to claim 1, wherein the refractory material comprises at least one of magnesium hydroxide and aluminum hydroxide.

9 (Previously Presented). The neutron shielding material composition according to claim 1 or claim 2, wherein the density-increasing agent is a metal powder having a density of 5.0 to 22.5 g/cm³, a metal oxide powder having a density of 5.0 to 22.5 g/cm³, or a combination thereof.

10 (Previously Presented). A neutron shielding material obtainable from the neutron shielding material composition according to claim 1 or claim 2.

11 (Previously Presented). A neutron shielding container obtainable from the neutron shielding material composition according to claim 1 or claim 2.

Claim 12 (Canceled).

13 (Previously Presented). The neutron shielding material composition according to claim 8, wherein said magnesium hydroxide is obtained from sea water magnesium.
